

3 women were recruited to the trial in November leaving just **15 more participants needed to complete the trial.**

Please keep STRIDER in mind over the next few months & keep up the momentum as we head towards the finish line!

Recruited

November recruitment. Our thanks to the teams at The Townsville Hospital, King Edward Memorial Hospital, Perth, and Royal Women's Hospital, Melbourne, who each enrolled one new participant to the trial this month.

STRIDER IPD collaboration update: STRIDER UK complete, NZAus next!

Each of the STRIDER trials will publish their results independently and then be included in a series of high quality individual patient data meta-analysis. With the USA MFM network planning a STRIDER trial, six trials are expected to contribute.

STRIDER UK completed recruitment in August and hope to report their results by the middle of next year. With our trial close behind, UK and NZAus will be the first trials included in trial sequential analysis.

Every centre has an important role to play in this great worldwide initiative.

STRIDER NZAus recruitment
