

We have recruited 70% of our STRIDER NZAus target!!

**Recruited
to date
85 / 122**

New recruits for June: one participant each enrolled at **KEMH, Perth, Royal Women's, Melbourne, Mater Mother's, Brisbane, Royal Hospital for Women, Sydney** and **Auckland City Hospital**, congratulations to all!

With 6 months of the year remaining we are on track to meeting our goal of completing recruitment in 2016! We will achieve this if every site contributes ONE participant every two months. Key messages from our discussion at the collaborators meeting and when speaking to individual sites have highlighted that the most challenging aspect is getting the referrals. While we won't identify all women with early onset IUGR antenatally we would love to see every potentially eligible woman who is diagnosed with IUGR in your hospital's catchment area offered the trial.

- The **STRIDER trial is generally well received** by those women it is offered to. After the initial approach anywhere from **50 – 80%** of women will be confirmed as eligible and choose to take part.
- Introducing the trial at the end of your counselling and then having one of the STRIDER team follow up soon after gives women time to consider the trial in what can be an overwhelming time and demonstrates that the trial is well supported by the department and referring clinicians.
- Having an MFM fellow actively involved in the trial can improve recruitment rates and moderate the workload of the initial protocol assessments.
- Feedback from women who have complete the trial has been positive, most felt reassured by the level of surveillance and would recommend taking part.

Update on the STRIDER IPD Collaborators meeting

Katie attended this meeting in London in April. It was a great opportunity to get an update on the other 4 STRIDER trials – UK completing in August, Netherlands underway, Ireland & Canada recruiting by the end of 2016. It seems very likely that UK & NZAus will be the first into the trial sequential analysis. We also took time to plan longer term follow-up, an umbrella DSMB and our approach to meta-analysis and IPD data analysis. The USA MFM Network are considering joining the Collaboration with a 6th STRIDER trial.

Larry Li, Tang Le, Chirag Kariya, Phil Baker, Katie Groom, Laura Magee, Peter von Dadelzen, Aris Papageorghiou, Christian Gluud (Louise Kenny)

| STRIDER NZAus recruitment | Women Recruited |
|---------------------------------|-----------------|
| Mater Mother's, Brisbane | 19 |
| National Women's, Auckland | 19 |
| Royal Women's, Melbourne | 12 |
| KEMH, Perth | 9 |
| Royal Brisbane Women's Hospital | 8 |
| Women's & Children's, Adelaide | 7 |
| Christchurch Women's Hospital | 5 |
| RHW, Sydney | 3 |
| Wellington Hospital | 2 |
| RPA, Sydney | 1 |
| Mercy Hospital for Women, Melb | 0 |
